Contents to volume 101

Computational physics

- Kopf, A., W. Paul and B. Dünweg
Multiple time step integrators and momentum conservation 1
- Utsumi, T., T. Kunugi and T. Aoki
Stability and accuracy of the Cubic Interpolated Propagation scheme 9
- Hoogland, J. and R. Kleiss
Discrepancy-based error estimates for Quasi-Monte Carlo. III. Error distributions and central limits 21
- Rasch, J. and C.T. Whelan
On the numerical evaluation of a class of integrals occurring in scattering problems 31
- Mohankumar, N. and A. Natarajan
The accurate evaluation of a particular Fermi–Dirac integral 47
- Ziegler, U. and H.W. Yorke
A nested grid refinement technique for magnetohydrodynamical flows 54
- Rasch, J., S.P. Lucey, C.T. Whelan and H.R.J. Walters
On the numerical evaluation of six dimensional integrals occurring in scattering problems 197
- Jaffet, D.E. and S. Youssef
Bayesian estimate of the effect of $B^0\bar{B}^0$ mixing measurements on the CKM matrix elements 206
- Bhattacharya, R., D. Roy and S. Bhowmick
Rational interpolation using Levin–Weniger transforms 213
- Glück, F.
Order- α radiative correction calculations for unoriented allowed nuclear, neutron and pion β decays 223
- Mrenna, S.
SPYTHIA, a supersymmetric extension of PYTHIA 5.7 232

Computer programs in physics

- Pöschl, W., D. Vretenar, A. Rummel and P. Ring
Application of finite element methods in relativistic mean-field theory: spherical nucleus 75
- Ingelman, G., A. Edin and J. Rathsman
LEPTO 6.5 – A Monte Carlo generator for deep inelastic lepton–nucleon scattering 108
- Ingelman, G., J. Rathsman and G.A. Schuler
AROMA 2.2 – A Monte Carlo generator for heavy flavour events in ep collisions 135

Rathsman, J. and G. Ingelman	
MAJOR 1.5 – A Monte Carlo generator for heavy Majorana neutrinos in <i>ep</i> collisions	143
Fack, V., S.N. Pitre and J. Van der Jeugt	
Calculation of general recoupling coefficients using graphical methods	155
Sunko, D.K.	
Code SPINDIS: nuclear shell-model level densities at high energies with a simplified pairing interaction	171
Papadopoulos, C.G.	
ERATO: event generator for four-fermion production at LEP2 energies and beyond	183
Hamilton, K.G. and F. James	
Acceleration of RANLUX	241
Hamilton, K.G.	
Assembler RANLUX for PCs	249
Cheb-Terrab, E.S., L.G.S. Duarte and L.A.C.P. da Mota	
Computer algebra solving of first order ODEs using symmetry methods	254
Ohl, T.	
circe Version 1.02: beam spectra for simulating linear collider physics	269
